 **armorgard**
ticking every box.

The CuttingStation™ has been at the forefront of the Armorgard product development program. Working closely with other industry professionals and those on the tools, we have designed the CuttingStation™ to reduce noise, dust and vibration, and increase safety whilst cutting on site.

Significantly reduces noise (depending on the material you're cutting)

Significantly reduces dust (depending on the material you're cutting)

A go-anywhere, multi-purpose cutting station with unrivalled safety features to minimise vibration, sparks, noise and dust.

cuttingstation™

Our ever-popular Armorgard CuttingStation™ is a neat, mobile workstation that eliminates the need for a separate cutting room and is essential for safely cutting lengths, such as conduit, timber, cable tray and pipe.

The new SS7 model is now even better! Improvements include new lighting and chamfered corners to further reduce noise. You'll also find a new expandable working area to accommodate mitre saws and cutaway sides for handling longer lengths. Improved support arms are now quicker and easier to change between four different configurations.

Integral health and safety features include rubber matting, fire-rated, noise-cancelling foam and PVC screens to contain sparks. Extraction and air filtration units can easily be fitted and a roomy, lockable cupboard provides secure storage. We've also recessed the plug sockets so they don't get knocked while you're wheeling the CuttingStation™ on to your next job.
