

SECATOL

TIC COLUMN SKIP

The TIC Centre Discharge Column Skip is designed to enable concrete to be poured into narrow shuttering or columns. The skips are fitted with a patented integral gate which ensures continuity of concrete flow and a 200mm diameter 3 metre long heavy duty discharge hose which prevents segregation.

Gate operation is by means of a nylon rope attached to a spring return lever ensuring excellent control whilst allowing the operator to control the pour from ground level.

The TIC is a rollover type skip whereby the skip sits in the horizontal position for filling and reverts to the vertical when in use.

Options available for the TIC are 90, 150 and 250mm diameter quick release funnels to give flexibility for numerous applications.

The TIC Gate mechanism is suitable for very fluid self compacting concrete.

Capacity in litres	Dimensions in mm							Unladen weight (Kg)
	A	D	h	h1	Length	Width	Height
